BIKE AND PEDESTRIAN WAY – PHASE I

The contractor has completed the linear striping of the bike lanes on Wooddale Avenue, Valley View Road, and West 54th Street.

Next week the contractor will continue the installation of painted pavement markings. This includes reestablishing the stop bars and painting the bike lane symbols. The contractor will also install pavement markings at the intersections along the east side of Wooddale Avenue to better delineate the parking lane from the drive lane.

The contractor will install solid green pavement markings on Valley View Road, east of Wooddale. Green shared lanes are used on roadways that are too narrow for dedicated bike lanes and where traffic volumes indicate a need to increase the visibility of regular shared lane markings. Motorists may drive on or over green shared lanes. If a bicycle is in the green shared lane, move to the left to pass unless there is oncoming traffic then hang back until it is safe to pass. See our website for more information on advisory bike lanes, http://edinamn.gov/index.php?section=advisory_bike_lanes.

All roadways will be open to traffic during the work. Minor delays can be expected due to the nature of the work.

See our website for what to do in emergencies, non-emergencies, site safety or if you have special events or home improvement projects plan, http://www.edinamn.gov/index.php?section=construction_bike_pedestrian_way.

Please encourage your neighbors to sign up for City Extra emails as this will be our primary method of communication during construction.

Sincerely,

Aaron Kuznia
